## Parallels Workstation for Linux

Parallels Workstation is the most powerful, easiest-to-use, cost-effective desktop virtualization solution available today. It empowers any user to create completely networked, totally secure independent, maximally stable virtual machines on a single physical machine. Virtual machines can run nearly any OS, including Windows 3.1 - XP/2003, Linux, FreeBSD, OS/2, eComStation, and MS-DOS.

### Resource Specifications:

Version:	2.0
Platform(s):	linux
Date Added:	March 02, 2006
