## Consolo - Web Content Management

Consolo is a content management tool for web sites. It has all the features of the leading CMS systems in the world - PHP, ASP, XHTML, XML, Databases, Flash, etc. You can tweak Consolo into suiting your needs and write your own scripts for it. What makes Consolo unique is its robust client application design. Consolo only uses a small server side installation, then all the work is done in the client (which you can shape into suiting you better). On the web site for Consolo there are many scripts and guides for you to get a jump start with the program. Consolo can currently be downloaded in a FREE version and you can even sell it to your clients to make money.
