## Room Booking System for Schools

The online Room Booking System is educational software that allows teachers to book rooms within your school saving important teaching time. You can book any sort of rooms, from Conference Suites to IT Rooms to Large Halls and Theatres It features two sections, an Administration section and a User section. The Administrator can manage the easy to use system and monitor any rooms that have been booked as well as rooms which have not. The User section is where staff and employees log on using their own Username's and Password's to book rooms and view bookings that have already been made. It is very simple to use and there is even a Tutorial to help you book rooms.
