EJ3 PageRanker

Using PageRanker tool you can know your website PageRank & Alexa Rank value, show these values in your website and follow its evolution through the time in a detailed profile illustrated with charts and graphics. PageRanker is FREE and very easy to use. You only need copy & paste the HTML code in your website to show your visitors a image with PageRank & Alexa Rank values. Also you can compare the profiles of two domains to determine its relative importance and popularity. This tool is specially useful for webmasters to compare his website info with the competence and for advertisers that can easily select the websites more popularities to deploy his advertising campaigns. However, you can spend some time checking pairs of websites to see who is more important.
