FlashStats 2006

Popular web site log file analyzer. Creates 60 reports, showing hits, visits, search engines and phrases, path analysis, and so on. Unique reports show web sites which are using your content without your permission, and hacking attacks against your site. FlashStats 2006 is easy to set up and use, and also provides easy yet powerful filtering technology so that you can drill down into the exact results that you're looking for.
