BannerBlair LIVE

Other banner ad rotators require tedious installations and more often than not a very good knowledge of multiple programming languages. BannerBlair LIVE offers you the functionality and results of one of the best banner rotation scripts out there without the hassle of installing a complicated script or managing a database. Simply create a BannerBlair LIVE account, paste two lines of code into your existing site, and add your banners through our control panel. THATS IT!!!

With BannerBlair LIVE you can load all of your banner ad codes into the control panel and it will automatically cycle through them without the page having to be refreshed. Not only does it cycle through the ads automatically, but visitors can also drop down and view all of your banner ads at the click of a mouse. This service is perfect for those who have multiple banner ads and those who use Commission Junction, Linkshare, BeFree and other similar affiliate programs.
