FeedForDev

FeedForDev VCL Control and ActiveX components makes it simple to communicate with users from within your software application! Integrate components into your application, to communicate with users. Use standard RSS feeds and provide users. All you have to do is add the FeedForDev component to your existing project. Set the URL to your RSS feed, and let it do the rest. You can then ask the control for types of information from your RSS feed.

Resource Specifications:

Version:	1.0.0.1
