verveCFListRand

verveCFListRand is a ColdFusion Custom Tag that can be used to generate a list of unique random numbers between (1) and (any number). You can then use the list to loop and output query results in random order.

Typical use of this tag would be in you wanted `<verveCFListRand list="1,2,3,4,5">` to display the results of a query or list in random order every time your ColdFusion page loads.
