Chameleon Flash

Chameleon Flash makes a Windows executable out of any SWF flash project, offering capabilities to create fully protected, license-managed games and programs that can be run in a window of any shape, full-screen, or even as a full-featured screen saver. Sell your SWF projects as time-limited, feature-restricted try-before-you-buy products. Distribute restricted evaluation versions and protect your SWF presentation against SWF decompilers.

Resource Specifications:
