IRUS - One-Click Thumbnail Create/Upload Utility

IRUS - Image Resize/Upload Software This little beauty allows you to take the pictures from your digital camera and automatically create 2 sets of resized images. One for viewing and one for thumbnails. (Great for shopping websites or image galleries!) You can generate the images and upload the files directly to your webserver with just one click. This application is freeware but we will accept Paypal donations. [A Paypal donation is required if you want us to respond to criticism. ;)]
